

# BUSINESS PHONE CLOUD SOLUTIONS

## Cloud Phone

Are you ready to upgrade your communications solution? Nex-Tech's Cloud Phone Solution brings a big business phone system to you at a lower total cost of ownership than what you're currently paying, and it's easy to manage. Nex-Tech delivers a high-quality, reliable solution over its managed network, so feature upgrades are done in the network seamlessly for you.

### You Have Complete Control

- » Administrators and users from your business can easily manage and control all communication features from any web browser.
- » Nex-Tech's Cloud Phone web portal gives each user complete control over how their phone is set up and used.
- » Tailor calling features to individuals or an entire business group.

## Accession Communicator

Add on Accession Communicator to your Cloud Phone solution. Accession Communicator is an application for your desktop and iPhone, iPad and Android devices that enables you to optimize your phone experience. With a variety of unique features, Accession Communicator will change the way you handle your business phone calls. Imagine transferring your call to another device with Call Jump while on the call, or having the ability to answer a call from any device when callers are using your landline number. Accession Communicator can do this and more.

### What Features Does Accession Communicator Offer?

**Device Twinning** – "Twinning" allows your landline number and another number to ring at the same time, providing you with a convenient, intuitive way to take your landline phone number with you while you're on the move. Calls to your landline number will simultaneously ring all of your mobile devices.

**Video Calling** – You can seamlessly transfer an existing call to video, on your mobile device, at the touch of a button.

**Call Jump** – With this feature, you have the ability to transfer a call from a landline to your mobile device. For example, if you are using your landline number at your desk in an open office and need a more private conversation, you can transfer the call to your smartphone with a simple press of a button and continue your call in a private setting.

### Smart Phone Integration

You can utilize your cell data or a Wi-Fi connection. By using Wi-Fi, you save your cell phone minutes.

### Features of our Standard Cloud Phone Service Include:

- » Web Portal for Feature Activation and Management
- » Caller ID
- » Voicemail
- » Call Forwarding
- » Find-Me-Follow-Me
- » SimRing  
(up to 5 phone numbers, including cell phones)
- » Call Hold, Including Music on Hold
- » Attendant Console
