

# PRIVATE CLOUD

Nex-Tech understands the tremendous challenge of delivering critical applications and data in today's workplace. That is the driving force behind our 'Cloud' solutions. Nex-Tech's Private Cloud can transform IT from a distraction, to a strategic advantage that increases productivity and ensures the right people have the right information at the right time.

## SET YOURSELF ON THE ROAD TO FREEDOM

Cloud technology allows businesses to move away from managing and upgrading their own IT infrastructure so they can focus on running their business. Nex-Tech's Private Cloud allows you to:

- Minimize capital expenditures on equipment and other upfront costs
- Spend less time worrying about and reacting to downtime
- Stay ahead of the technology curve
- Access data and applications anywhere, at any time, on almost any device

## BUILT-IN DISASTER RECOVERY/BUSINESS CONTINUITY

- Proper data backup is extremely important to any business. Whether you simply lose a file or you experience a complete disaster, you have to know that your data is recoverable.
- With Nex-Tech's Private Cloud, disaster recovery and data backup are built into the solution, allowing you to sleep at night knowing that your data is safe and secure regardless of the situation.

## SECURE DATA YOU CAN SEE

Have you ever wondered exactly where your data is when it is stored in the "cloud"? With Nex-Tech's Private Cloud, the guessing is over. Just ask us, and we'll show you.

Nex-Tech's Private Cloud offers:

- Multiple datacenters supporting redundant power, cooling and connectivity for maximum availability.
- High bandwidth connections for seamless operation. Multiple high-speed connectivity options include VPN and Metro Ethernet.
- Physical and virtual security.
- Network Operations Center 24/7 monitoring.
