

2018-19 Nex-Generation Work Study/Apprentice Scholarship Program

When applying as a Work Study, students are asked to list up to two businesses on their application form. They can select *any* business in their community to which they are interested in working. (The list below indicates those businesses that are already participating in either the Work Study or Internship programs we offer.) Students must also include a letter of support from each business to which they are applying. Please see the application for details: www.nex-generation.org under Work Study/Apprenticeship Program.
