FOR IMMEDIATE RELEASE

Nex-Tech featured in two national publications for keeping Kansas connected

Lenora, Kan, 09-29-17 — If you check out the September issues of Business Review USA or Gigabit, you'll see some familiar names starting on pages 140 or 92, respectively. Jimmy Todd, CEO of Nex-Tech, LLC, gave an exclusive interview to Business Review USA, resulting in a 10-page feature written by Neil Walker and produced by Eric Lenhardt.

In the article, Todd speaks about the company's plight to supply reliable fiber technology to rural Kansas. Todd is all too aware of technology's lightning-fast pace and has worked hard to ensure Nex-Tech is at the forefront of its service offerings.

This, he is keen to highlight, is a team effort. "We have some brilliant people on staff that are truly experts in what we do. They are constantly involved in working with our vendors to look at what is going to be available in the near future, how that fits in with the services we currently offer, and how it would be utilized or implemented."

"It's a constant effort, not something you can do once and feel good about it for a few years. Today, you don't buy technology that lasts 20 years – you forecast for five years hoping that you'll get three-and-a-half," Todd emphasized.

Nex-Tech considers itself a local citizen, giving back to the community wherever it can. It has created a solid relationship with a local university to provide training and the potential for jobs, and it helps high schools with scholarships and internships. Alongside treating local education centers as partners, Nex-Tech does the same for customers and suppliers, striving for positive associations across the board.

"It's about having good communication and strong relationships, and when new vendors come on board, we put them through the wringer. If their equipment meets the specifications we're

looking for, we put it in the lab – just like with our current vendors – and see if it makes the grade.”
