Nex-Tech To Begin Fiber Construction in Twin Lakes

Great Bend, Kan, 5-12-2020— Today, Nex-Tech announced it will begin fiber construction in the Twin Lakes area, Zone A, in late summer. Initial feasibility studies indicated that Nex-Tech would need a 55% interest level to build fiber to each zone in Great Bend. The Twin Lakes zone has not yet reached that level, but based upon results from the Bissell's Point zone, the first to meet the required interest level, Nex-Tech is confident interest will continue to grow in Twin Lakes.

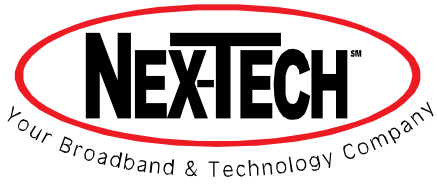

Nex-Tech is preparing for the pre-construction phase for Twin Lakes. Engineers and surveyors will map the area and finalize diagrams to prepare for the construction teams to begin. The engineers will make their plans according to the addresses of residents that have already shown interest in receiving Nex-Tech fiber. Once construction begins, new addresses being added may experience a delay in getting services, due to them not being included on the initial plan. Nex-Tech encourages residents to register for fiber service now, so they will be included in the plan.

Jimmy Todd, Chief Executive Officer at Nex-Tech, shared his thoughts about delivering fiber Internet, TV and phone services to the Twin Lakes area. "During this challenging time, it has become increasingly clear how important reliable Internet service is. Whether it's connecting for remote working or learning, video chatting with loved ones, streaming entertainment, or getting your local business online, fiber is the only technology that is guaranteed to meet the needs of today and those to come."

Rick Taylor, Nex-Tech Business Sales Associate, shared his thoughts. "As a long time resident of Great Bend, I couldn't be more excited about this project. With a 200 Mbps connection, multiple people can work and learn at home simultaneously, telemedicine can be conducted from the living room and the entertainment options are endless. With the new challenges we are all facing, reliable Internet is also critically important for local businesses as they adapt to the new normal. Great Bend deserves the same advanced technology that many other areas in central and western Kansas already enjoy."

Nex-Tech urges residents that haven't registered for fiber to do so now. They have temporarily waived the sign-up fee and are still offering their pre-construction special of 200 Mbps symmetrical Internet starting at \$59.99 per month. Nex-Tech's popular streaming TV service can be added for \$76 per month. Registration should be made at www.fiber.nex-tech.com or by calling the local store at 620-792-3908.
