Nex-Tech Announces Cloud-based Network Monitoring Platform

LENORA, Kan., Jan 12, 2021—Nex-Tech, a leader in business technology solutions and connectivity, announced today the launch of Nex-Tech NOC Cloud, an easy-to-access and cost-effective network monitoring system that virtually eliminates the high cost of maintaining a network control center. Additionally, the utilization of a centralized maintenance system reduces personnel requirements by combining or eliminating multiple systems or terminals and placing all under a single control center with individual access.

TWO LEVELS OF NOC CLOUD

Nex-Tech NOC Cloud is a cloud-based automated alarm aggregation system with reporting and notification tools. Customer personnel logs in and monitors the system without incurring hundreds of thousands of dollars in upfront equipment costs.

Nex-Tech NOC Cloud Pro is full-service, incorporating all the above with 24x7x365 staffing, data analytics and network intelligence.

FEATURES AT A GLANCE

- Cloud-based, edge computing network management system
- User-friendly dashboard
- Voice, text and email alarm notifications
- Ticketing system
- Eliminates onsite hardware
- More here: <https://www.nex-tech.com/Business/Carrier/NOCCloud.aspx>

“Nex-Tech NOC Cloud is a great opportunity for companies researching network monitoring products to gain access to a low-cost, yet highly effective entry-level system.” says Bill Mathews, Managing Director, Nex-Tech, Cordell Division. “Having utilized the system for several years, we know it is accurate, an easy install, and allows users the ability to reallocate personnel for better use of resources.”

About Nex-Tech

Nex-Tech connects thousands of people and businesses through a robust broadband network. Nex-Tech’s powerful fiber-to-the-premise technology delivers leading-edge enterprise solutions to clients nationwide including cloud services, servers, security, phone systems, hosted PBX, managed IT, advertising solutions, and network operations monitoring.
